

# GUARDIAN WATER TREATMENT

## AIR & WATER HYGIENE SPECIALISTS

### Onsite Training Services

Guardian Water Treatment offer a range of in-house and on-site training courses suited to both managers and maintenance engineers alike. Our courses cover everything from Legionella Awareness to Cooling Tower Chemistry.

Our popular Legionella Awareness Course includes the following:

#### Legionella Training Course

- An introduction to the chemistry of water
- An Introduction to the Control of Legionella Bacteria in Water Systems.
- A brief summary of scale, corrosion, suspended solids and microbiological activity associated with water
- Water and its use in cooling towers and cooling systems.
- Water and its use in hot and cold water systems
- The history of Legionella and Legionnaires' disease
- Legionella risks in cooling towers and cooling systems
- Legionella risks in hot and cold water systems
- An introduction to the Health and Safety Commissions Approved Code of Practice and Guidance (ACoP)
- Case studies, a review of selected case studies involving Legionella and Legionnaires' disease.
- Examination, short test of competence covering course content. Upon successful completion of the examination candidates will receive a Legionella Control 'Certificate of Competence'
- Discussion and feedback including practical examples and experiences from the course tutors.

#### Delegates Will Learn

- What types of water systems are at risk.
- About Legionella bacteria, how and why it causes problems.
- About the latest approved code of practice (L8) and procedures to control Legionella bacteria risks.
- About current UK legislation, your obligations and the importance of compliance.
- About recent outbreaks of Legionnaires' disease, consequences of any failings, resulting action and lessons learned.
- About practical examples from an experienced Legionella specialist.

#### Certification

Course delegates will receive a Legionella Control 'Certificate of Competence' Level 1, following the successful completion of the course.

### Why choose Guardian?

We care about our clients and their premises which is reflected from our service. Guardians business is built and continues to grow around our clients needs.

*Our mission is to be the Air and Water Hygiene Specialist provider by choice, offering our clients excellence and good value.*

### The Safeguard System

If left unchecked, water systems can be compromised by biofilms and corrosion. Guardian's long standing dedicated water management system known as 'The Safeguard System' can protect pipe-work from scale and microbial attack, saving you energy and additional maintenance costs.

### CARE

Guardian now offer a tightly integrated 'online' information service, providing upto the minute feedback on clients work including: quotes, site visits, documents, contact details, order acknowledgements and much more...

### Log Book

CARE, can be up-graded to include Guardians innovative Log Book that helps companies comply with the latest Health and Safety requirements such as: ACOP L8 - The control of legionella bacteria in water systems.
